

Welcome to the “Alpha-Phonics workbook by Samuel L. Blumenfeld.

This book has been used by thousands of parents who have taught their children to be excellent readers, which includes my children.

It is arranged in 128 easy to follow lessons. Sam rightfully pointed out that pictures of puppets popping out of trash cans are not needed to teach children how to read. This book may also be used for adults who have been taught the whole word or look-say method and therefore are functionally illiterate.

While this is a free resource, we would like to be able to make this resource known far and wide. A donation of \$1.00 would go a long way, and you can donate more to help our cause, too.
